Targeting a junior level opportunity in software development

Software Engineering

- **Known for excellent T-SQL skills**, offering experience in writing clear and solid code, excellent development skills to write complex queries based on the logical query processing, great ability to develop and maintain various database objects like stored procedures, triggers, user-defined functions.
- **Excellent troubleshooting skills**, analyzing complex code and provide efficient solutions, attention to detail, can thoroughly exercise a program, and clearly report and fix any bugs
- **Strong Relational Database skills** with emphasis on hand-coding object creation to ensure accuracy and ease of deployment

Education

CPU Code School 2018

- CPU Code School training covers the full stack of software development, from requirements gathering to implementation of database, middle tier, and front end. Student is trained to develop in SQL Server, VB.Net, C#, ASP.Net, and Xamarin for mobile apps. Extra emphasis is placed on best practices and real-world scenarios so that student is prepared to enter the work force and provide exceptional value to his or her team.

Segments Completed:

- | | |
|--|--|
| • Relational Database Schema Design | • Cloud Computing |
| • SQL DDL: Create databases and tables with keys and constraints | • Provision and configure SQL Servers, databases, security |
| • SQL DML: CRUD queries, functions, stored procedures | • VB.NET |
| | • Object Oriented Programming |
| | • HTML, CSS, JavaScript |

Work Experience

Support Manager, April 2018 to Present – H.C.I.T., Bardonia NY

- Provide user requirements analysis, design and programming support for enhancement of application, troubleshooting and tracking down software bugs.
- Program stored procedures, user defined functions, database triggers and all the database objects needed in a T-SQL environment to implement business logic.
- Write clear and detailed technical specifications and documentation. Analyze end-user database needs and provide efficient solutions
- Work Within an Agile Scrum Team

Technology Summary

- SQL Server, Microsoft Azure
